Objective

Motivated and detail-oriented **senior cybersecurity student** seeking an **information security internship** in security operations, IAM, software engineering, network defense, or threat analysis. Strong foundation in cybersecurity principles, operating systems, and secure coding, with hands-on experience from coursework, labs, and internships. Skilled in vulnerability analysis, system hardening, and user support. Fluent in Polish and English, with proven teamwork and leadership experience as a former Division I student-athlete.

Education

University of Idaho — **Moscow, ID**
Master of Science in Cybersecurity — *Expected Dec 2027*
Graduate coursework in cybersecurity completed concurrently with undergraduate studies.

University of Idaho — **Moscow, ID**
Bachelor of Science in Cybersecurity, Minor in Computer Science, GPA: 3.89 — *May 2027*

Experience

Student Technology Center, University of Idaho — **Moscow, ID**
IT Service Desk — *Aug 2025 – Feb 2026*

- Provide technical and security-focused support for students, faculty, and staff, including account access, MFA issues, software setup, and network connectivity.
- Troubleshoot Windows and macOS systems, Active Directory user accounts, and authentication-related incidents.
- Assist with enforcing security controls and access management in accordance with university IT policies.
- Create and maintain technical documentation aligned with security standards and procedures.

Schweitzer Engineering Laboratories — **Pullman, WA**
Software Engineering Intern — *Feb 2026 – Present*

- Develop and implement basic protective relay logic and functional routines using SEL commands to support relay functionality.
- Write Python automation scripts to streamline recurring tasks, improve workflow efficiency, and reduce manual effort.
- Perform validation and regression testing for SEL Blueframe applications to verify software functionality, reliability, and quality prior to release.
- Execute configuration and compatibility testing to reproduce and investigate customer-reported issues across supported environments.
- Collaborate with engineers to identify, document, and verify software defects, contributing to continuous product improvement.
- Develop and maintain technical documentation, including product manuals, release materials, and configuration guides.

Technical Skills

- **Programming & Scripting:** Python, C, C++, Bash, LaTeX; Python automation scripting
- **Cybersecurity Tools:** Wireshark, Security Onion, Greenbone, SCAP, Virtual Machines
- **Systems & Platforms:** Windows, macOS, Linux, Active Directory (Windows Server)
- **Concepts:** Vulnerability analysis, system hardening, access control, secure software design, network security, digital forensics (basic)
- **Other:** Git/GitHub, debugging, software testing, process automation

Projects

- **ISP Network Monitoring Web Application (Senior Design):** Developing a web application that aggregates router data into a unified dashboard to monitor network health, identify issues, and help prevent outages.
- **Cybersecurity E-Portfolio:** Developed and deployed an HTML, CSS, and JavaScript portfolio using GitHub Pages to showcase cybersecurity projects, labs, and reports.
- **Network Defense & Simulation:** Designed segmented network topologies in Cisco Packet Tracer with multiple subnets, DNS, DHCP, and web servers; analyzed configurations for security risks and reliability.
- **Household Finance Web Application:** Built a full-stack Python, HTML, and JavaScript application with a four-person team during a 9-hour hackathon, integrating REST APIs for real-time financial market data.
- **Vulnerability Assessment Labs:** Used Greenbone and SCAP benchmarks to identify system vulnerabilities, analyze findings, and evaluate security remediations.

Certifications

- **CompTIA Security+** — February 2026

Leadership, Activities & Languages

- **Division I Student-Athlete (2023–2025):** Demonstrated leadership, teamwork, discipline, and time management while balancing athletics, academics, and work.
- **Student-Athlete Advisory Committee (2023–2025):** Collaborated on student-athlete welfare initiatives and campus engagement programs.
- **Languages:** Fluent in English and Polish.
