Objective

Motivated and detail-oriented **senior cybersecurity student** seeking an **information security internship** in security operations, IAM, software engineering, network defense, or threat analysis. Strong foundation in cybersecurity principles, operating systems, and secure coding, with hands-on experience from coursework, labs, and internships. Skilled in vulnerability analysis, system hardening, and user support. Fluent in Polish and English, with proven teamwork and leadership experience as a former Division I student-athlete.

Education

University of Idaho

Bachelor of Science in Cybersecurity, Minor in Computer Science, GPA: 3.89

Moscow, ID

Aug 2023 – May 2027

Experience

Student Technology Center, University of Idaho

IT Service Desk

Moscow, ID

Aug 2025 – Feb 2026

- Provide technical and security-focused support for students, faculty, and staff, including account access, MFA issues, software setup, and network connectivity.
- Troubleshoot Windows and macOS systems, Active Directory user accounts, and authentication-related incidents.
- Assist with enforcing security controls and access management in accordance with university IT policies.
- Create and maintain technical documentation aligned with security standards and procedures.

Schweitzer Engineering Laboratories

Software Engineering Intern

Pullman, WA

Feb 2026 – Present

- Perform validation and regression testing for SEL Blueframe applications to verify software functionality, reliability, and quality prior to release.
- Execute configuration and compatibility testing to reproduce and resolve customer-reported issues, ensuring software operates correctly across supported environments.
- Collaborate with other engineers to identify, document, and verify defects, contributing to continuous product improvement.
- Develop and maintain customer-facing technical documentation, including product manuals, release materials, and configuration guides to improve usability and support.

Technical Skills

- **Programming & Scripting (basic):** C, C++, Bash, Python, LaTeX
- **Cybersecurity Tools:** Wireshark, Security Onion, Greenbone, SCAP, Virtual Machines
- **Systems & Platforms:** Windows, macOS, Linux, Active Directory (Windows Server)
- **Concepts:** Vulnerability analysis, system hardening, access control, secure software design, network security, digital forensics (basic)
- **Other:** Git/GitHub, process management, debugging tools

Projects

- **Cybersecurity E-Portfolio Website:** Designed and deployed a personal cybersecurity portfolio website using HTML, CSS, and JavaScript to showcase technical projects, labs, and written tutorials. Hosted the site via GitHub Pages and managed version control using Git/GitHub. Integrated downloadable technical documentation, diagrams, and reports related to cybersecurity coursework and projects.
- **Network Defense & Simulation Projects:** Designed and simulated a secure network topology using Cisco Packet Tracer, including multiple subnets, DNS, DHCP, and web servers. Analyzed network configurations and traffic flows to identify security risks and improve network segmentation and reliability.
- **Household Finance Management Web Application:** Built a full-stack household finance management application with a team of four during a 9-hour hackathon using Python, HTML, and JavaScript. Implemented backend functionality, integrated REST APIs for real-time financial market data, and delivered a working prototype under tight development deadlines.
- **Vulnerability Assessment & Security Analysis Labs:** Conducted vulnerability scans using Greenbone and SCAP benchmarks to identify system and configuration weaknesses. Analyzed scan results and applied remediation techniques aligned with system hardening and security best practices.

Certifications

- **CompTIA Security+** — February 2026

Leadership, Activities & Languages

- **Division I Student-Athlete (2023–2025):** Demonstrated leadership, teamwork, discipline, and time management while balancing athletics, academics, and work.
- **Student-Athlete Advisory Committee (2023–2025):** Collaborated on student-athlete welfare initiatives and campus engagement programs.
- **Languages:** Fluent in English and Polish.
